Business profile

Primekss is a concrete technology and contracting company that uses a unique, patented, significantly improved system – PrīmXComposite (High Performance Steel Fiber Reinforced Concrete technology) to install high quality industrial concrete floors, foundations and structural elements. We are also cost-effective, experienced contractor building traditional rebar reinforced concrete cast-in-place structures, yet with added angle of taking special care about the concrete and using advanced quality control system.

Products / services:

- Industrial concrete floors (on ground and piles), outdoor solutions;
- Jointless, watertight foundation plates (mat foundations);
- Efficient and fast Zero cycle solutions using combination of steel fibers and steel reinforcement bars;
- Integrated basement – parking lots;
- Gas and watertight solutions;
- PrīmXComposite- FILIGRAN® system - semi-precast elevated slabs;
- Traditional concrete works (any monolithic concrete casting works for residential and industrial buildings, e.g. foundations, walls, slabs, columns etc., taking special care of concrete quality and using advanced quality control system)

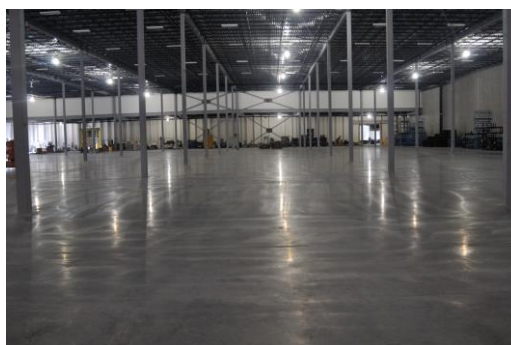

Main markets: Sweden, Finland, Norway, Denmark, Estonia, Latvia, Lithuania, Kazakhstan, Belarus, Russia, Serbia, Bulgaria, Israel, Germany, Belgium, Netherlands, S-Africa, India, China, USA.

Co-operation interests

- Production of industrial concrete floors (slabs on ground and piles), outdoor solutions;
- Zero cycle solutions using combination of own steel fibers reinforced non shrink concrete technology and steel reinforcement bars;
- Watertight, jointless foundation plates;
- Integrated basement – parking lots;
- Integrated concrete frames in PrīmXComposite and steel bar reinforced concrete structures;
- PrīmXComposite- FILIGRAN® system semi-precast elevated slabs;
- Any monolithic concrete casting works for residential and industrial buildings, e.g. foundations, walls, slabs, columns etc., taking special care of concrete quality.
